

January 2007

To Whom It May Concern:

It is my pleasure to recommend Steve Hamlin for his outstanding design work for CD's and websites.

I worked with Steve in 2002 to create a compilation disk as a gift for my husband. Using aged cassette tapes, Steve digitally remastered the recordings onto a CD. He also designed the CD insert. Throughout this project, Steve demonstrated an unflagging attention to detail. The final project certainly reflected his tireless dedication, all the while ensuring that every concept and decision met with my input and approval.

Two years later, I returned to Steve's studio with my teenage daughter Hannah. Over two strenuous days, we recorded 10 songs for her first CD. Again, Steve worked tirelessly under an impossible deadline to complete Hannah's project. As always, Steve took input from her on every aspect of the work—including mixing the music, putting the songs in order, and designing the CD insert. He even incorporated a piece of artwork that Hannah created with a classmate.

The graphic designs from both projects can be viewed on Steve's website.

Steve's artistic eye, attention to detail, high technological competence, and integrity in working with customer preferences provides wonderful results. I recommend him without hesitation!

Sincerely,

Wendy Long
